

## **College of Science Promotion and Tenure Peer Review of Teaching**

**7-1-2021**

This is an area in need of development. Integrative Biology has good procedures, which we should use as a starting point for a college wide discussion. Just some thoughts here. I hope we can work on this next year. The university also plans to work on this topic next year.

Peer evaluation of teaching has to be continuous and performed on a yearly basis. It is not a matter of checking boxes in a rubric, but it takes time for observation and discussion. Yearly reports from peer review of teaching should be included in the personnel file. It will make sense that a peer teaching committee can use these letters as part of their evaluation.

The peer review letter in the dossier should not be written by just one person.
